

Investment Philosophy

We believe a portfolio of select large cap stocks may achieve above-benchmark long-term performance through capital appreciation, and by limiting downside risk.

Investment Strategy

- Invests in large cap companies we believe have an attractive combination of valuation, fundamental, earnings and technical characteristics.
- Utilizes proprietary, multi-factor, sector-specific models to rank stocks within each sector.
- Initial equal weight positions.
- Optimizes the portfolio to provide broad diversification across sectors, industries and individual companies, while controlling turnover.
- Utilizes proprietary risk screens to eliminate stocks we believe are likely to underperform.

Product Highlights

- Quantitatively-based investment process with stringent risk controls.
- Integrates fundamental factors into proprietary quantitative models.
- Focuses on underperformance risk as much as outperformance opportunity.

The Quantitative U.S. Large Cap Value Equity Composite objective is to provide maximum long-term total return consistent with reasonable risk to principal by investing, under normal market circumstances, at least 80% of the value of its net assets (including borrowings for investment purposes) in common stocks of the Russell 1000 Value universe.

The Russell 1000 Value Index is an unmanaged, market value weighted index, which measures the performance of those 1,000 largest companies in the Russell 3000 Index with lower price-to-book ratios and lower forecasted growth values. One cannot invest directly in an index.
