High Yield Municipal Portfolio
SCHEDULE OF PORTFOLIO INVESTMENTS — (Concluded)
July 31, 2021 - (Unaudited)

* Percentages indicated are based on net assets.

¹ Zero Coupon Bond.

² Variable/Floating interest rate security. Certain variable/floating interest rate securities are not based on a published reference rate and spread but are determined by the issuer or agent and are based on current market conditions. These securities do not indicate a reference rate and spread in their description above. Rate presented is as of July 31, 2021.

³ Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended. This security may be resold in transactions exempt from registration, normally to qualified buyers. At July 31, 2021, these securities, which are not illiquid, amounted to \$40,494,759 or 14.0% of net assets for the Fund.

⁴ When-issued security.

⁵ This security is in default. See Note 1.

⁶ Floating Rate Bond. Rate shown is as of July 31, 2021.

Abbreviations:

GNMA — Government National Mortgage Association

MBIA — Municipal Bond Investors Assurance

NPFG — National Public Finance Guarantee Corporation

SIFMA — Securities Industry and Financial Markets Association

Notes to Schedules of Portfolio Investments (Unaudited)

1. Organization and Significant Accounting Policies

As of July 31, 2021, The Glenmede Fund, Inc. (the "Fund") consists of seventeen portfolios: the Quantitative U.S. Large Cap Core Equity Portfolio, the Quantitative U.S. Large Cap Growth Equity Portfolio, the Quantitative U.S. Large Cap Value Equity Portfolio, the Quantitative U.S. Small Cap Equity Portfolio, the Quantitative International Equity Portfolio, the Responsible ESG U.S. Equity Portfolio, the Women in Leadership U.S. Equity Portfolio, the Quantitative U.S. Long/Short Equity Portfolio, the Quantitative U.S. Total Market Equity Portfolio, the Strategic Equity Portfolio, the Small Cap Equity Portfolio, the Equity Income Portfolio, the Secured Options Portfolio, the Global Secured Options Portfolio, the Core Fixed Income Portfolio, the Short Term Tax Aware Fixed Income Portfolio and the High Yield Municipal Portfolio (each, a "Portfolio" and collectively, the "Portfolios"). The Fund was incorporated in the State of Maryland on June 30, 1988, and is registered with the Securities and Exchange Commission (the "SEC") under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company.

Since January 2, 1998, the Small Cap Equity Portfolio has consisted of two classes of shares: the Advisor Class and the Institutional Class. Since June 30, 2015, the Quantitative U.S. Large Cap Core Equity Portfolio and the Quantitative U.S. Large Cap Growth Equity Portfolio have offered two classes of shares: the Advisor Class and the Institutional Class. The Institutional classes commenced operations on December 30, 2015 and November 5, 2015, respectively. Since July 14, 2016, the Secured Options Portfolio has offered two classes of shares: the Advisor Class and the Institutional Class. The Institutional Class shares of the Secured Options Portfolio commenced operations on November 9, 2016. Since February 14, 2019, Quantitative U.S. Long/Short Equity Portfolio has offered two classes of shares: the Advisor Class and the Institutional Class. As of that date, the existing class of the Quantitative U.S. Long/Short Equity Portfolio changed its name to the Advisor Class. The Institutional Class shares of the Quantitative U.S. Long/Short Equity Portfolio commenced operations on September 13, 2019. The High Yield Municipal Portfolio, the Responsible ESG U.S. Equity Portfolio and the Women in Leadership U.S. Equity Portfolio commenced operations on December 22, 2015. The Short Term Tax Aware Fixed Income Portfolio commenced operations on June 29, 2016. The Equity Income Portfolio commenced operations on December 21, 2016. The Quantitative U.S. Large Cap Value Equity Portfolio and Quantitative U.S. Small Cap Equity Portfolio commenced operations on November 13, 2017.

Valuation of Securities: Equity securities and options listed on a U.S. securities exchange, including exchange-traded funds ("ETFs"), for which market quotations are readily available are valued at the last quoted sale price as of the close of the exchange's regular trading hours on the day the valuation is made. These securities are typically categorized as Level 1 in the fair value hierarchy. Price information on listed securities is taken from the exchange where the securities are primarily traded. Securities traded on the NASDAQ System are valued at the NASDAQ Official Closing Price ("NOCP") and are typically categorized as Level 1 in the fair value hierarchy. Unlisted equity securities and listed securities not traded on the valuation date for which market quotations are readily available are valued at an amount that does not exceed the asked price and is not less than the bid price and are typically categorized as Level 2. If no sales are reported, exchange traded options are valued at the mean of the bid and ask price and are typically categorized as Level 2. Options traded over-the-counter are valued using prices supplied by dealers and are typically categorized as Level 2. Securities and options listed on a foreign exchange and unlisted foreign securities that are traded on the valuation date are valued at the last quoted sales price available before the time when assets are valued and are typically categorized as Level 1. Investments in open-end registered investment companies are valued at their respective net asset values ("NAVs") as reported by such companies, and are typically categorized as Level 1.

Bonds and other fixed-income securities are valued at the most recent quoted bid price or, when exchange valuations are used, at the latest quoted sale price on the day of valuation. Such securities are typically categorized as Level 2 in the fair value hierarchy. In addition, bond and other fixed-income securities may be valued on the basis of prices provided by a pricing service or by using a matrix or formula. In such instances, when the Portfolio's investment advisor believes such prices reflect the fair market value of such securities and are based on observable inputs, these securities are typically categorized as Level 2. Debt securities purchased with maturities of 60 days or less at the time of purchase are valued at amortized cost and are typically categorized as Level 2. Amortized cost valuation involves valuing an instrument at its cost initially and thereafter assuming a constant amortization to maturity of any discount or premium, regardless of the effect of fluctuating interest rates on the market value of the instrument.

When market quotations are not readily available or events occur that make established valuation methods unreliable, securities and other assets are valued in a manner that is intended to reflect their fair value as determined in accordance with procedures approved by the Board of Directors of the Fund (the "Board") and are typically categorized as Level 3 in the fair value hierarchy. The fair value of securities is generally determined as the amount that a Portfolio could reasonably expect to realize from an orderly disposition of such securities over a reasonable period of time. By its nature, a fair value price is a good faith estimate of the value of a security at a given point in time and does not reflect an actual market price, which may be different by a material amount.

Financial Accounting Standards Board ("FASB") Statement of Financial Accounting Standard Codification ("ASC") Topic 820, "Fair Value Measurements" defines fair value, establishes a three-level hierarchy for measuring fair value and expands disclosure about fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of each Portfolio's investments. Inputs refer broadly to the assumptions that market participants would use in pricing a security. Observable inputs are inputs that reflect the assumptions market participants would use in

Notes to Schedules of Portfolio Investments (Unaudited) — (Continued)

pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances. These inputs are summarized in the three levels listed below:

Level 1 — quoted prices in active markets for identical investments;

Level 2 — other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, adjusted quoted prices on foreign equity securities and others) or valuations based on quoted prices in markets that are not active; and

Level 3 — significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities.

Changes in valuation techniques may result in changing an investment's assigned level within the hierarchy.

The Quantitative U.S. Large Cap Core Equity Portfolio, Quantitative U.S. Large Cap Growth Equity Portfolio, Quantitative U.S. Large Cap Value Equity Portfolio, Quantitative International Equity Portfolio, Responsible ESG U.S. Equity Portfolio, Women in Leadership U.S. Equity Portfolio, Quantitative U.S. Long/Short Equity Portfolio, Quantitative U.S. Total Market Equity Portfolio, Strategic Equity Portfolio, Small Cap Equity Portfolio and Equity Income Portfolio had all investments with corresponding industries at Level 1 except repurchase agreements which were at Level 2, at July 31, 2021. The High Yield Municipal Portfolio had all investments with corresponding states at Level 2 at July 31, 2021.

The Portfolios did not recognize any Level 3 transfers as of the quarter ended July 31, 2021. Transfers into and out of a level are typically recognized at the end of the reporting period.

The following is a summary of the inputs used as of July 31, 2021 in valuing the assets and liabilities of the Quantitative U.S. Small Cap Equity Portfolio, Secured Options Portfolio, Global Secured Options Portfolio, Core Fixed Income Portfolio and Short Term Tax Aware Fixed Income Portfolio:

Quantitative U.S. Small Cap Equity Portfolio

COVID-19: In early 2020, an outbreak of a novel strain of coronavirus ("COVID-19") emerged globally. This coronavirus has resulted in closing international borders, enhanced health screenings, healthcare service preparation and delivery, quarantines, cancellations, disruptions to supply chains and customer activity, as well as general public concern and uncertainty. The impact of this outbreak has negatively affected the worldwide economy, as well as the economies of individual countries, the financial health of individual companies and the market in general in significant and unforeseen ways. Although vaccines for COVID-19 are becoming more widely available, the future impact of COVID-19 is currently unknown, and the pace of recovery may vary from market to market, which may exacerbate other risks that apply to the Fund's Portfolio(s), including political, social and economic risks. Any such impact could adversely affect the Portfolios' performance, the performance of the securities in which the Portfolios invest and may lead to losses on your investment in the Fund's Portfolio(s). The ultimate impact of COVID-19 on the financial performance of the Portfolios' investments is not reasonably estimable at this time.

Repurchase Agreements: Each Portfolio may engage in repurchase agreement transactions. Under the terms of a typical repurchase agreement, the applicable Portfolio takes possession of an underlying debt obligation subject to an obligation of the seller to repurchase, and the applicable Portfolio to resell the obligation at an agreed-upon price and time, thereby determining the yield during the Portfolio's holding period. This arrangement results in a fixed rate of return that is not subject to market fluctuations during the Portfolio's holding period. The seller's obligation is secured by collateral (underlying securities) segregated on behalf of the Portfolio. The value of the collateral at the time of execution must be at least equal to 102% of the total amount of the repurchase obligations, including interest. In the event of counterparty default, the Portfolio has the right to sell the collateral to offset losses incurred. There is a potential for loss to a Portfolio in the event the Portfolio is delayed or prevented from exercising its rights to dispose of the collateral securities, including the risk of a possible decline in the value of the underlying securities during the period while the Portfolio seeks to assert its rights. Each Portfolio's investment advisor, acting under the supervision of the Board, reviews the value of the collateral and the creditworthiness of those banks and dealers with which each Portfolio enters into repurchase agreements to evaluate potential risks.

Master Repurchase Agreements ("MRA") permit a Portfolio, under certain circumstances, including an event of default (such as bankruptcy or insolvency), to offset payables and/or receivables under the MRA with collateral held and/or posted to the counterparty and create one single net payment due to or from the Portfolio. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against such a right of

THE GLENMEDE FUND, INC.

Notes to Schedules of Portfolio Investments (Unaudited) — (Continued)

offset in the event of the MRA counterparty's bankruptcy or insolvency. Pursuant to the terms of the MRA, the applicable Portfolio receives or posts securities as collateral with a market value in excess of the repurchase price to be paid or received by the Portfolio upon the maturity of the transaction. Upon a bankruptcy or insolvency of the MRA counterparty, the Portfolio would recognize a liability with respect to such excess collateral to reflect the Portfolio's obligation under bankruptcy law to return the excess to the counterparty. The gross value and related collateral received for each Portfolio's investments in repurchase agreements as of July 31, 2021 are presented in each Portfolio's Schedule of Portfolio Investments.

As of July 31, 2021, the following table is a summary of the Fund's repurchase agreements by counterparty which are subject to offset under an MRA:

Quantitative U.S. Large Cap Core Equity Portfolio

^(a) The value of the related collateral exceeded the value of the net position in the repurchase agreements as of July 31, 2021. The total value of the non-cash collateral received is disclosed in the Schedules of Portfolio Investments.

^(b) Net exposure represents the receivable (payable) that would be due from (to) the counterparty in the event of default.

Foreign Currency Translation: The books and records of each Portfolio are maintained in U.S. dollars. Foreign currencies, investments and other assets and liabilities are translated into U.S. dollars at the exchange rates prevailing at the

Notes to Schedules of Portfolio Investments (Unaudited) — (Continued)

end of the period, and purchases and sales of investment securities, income and expenses are translated at exchange rates prevailing on the dates of such transactions. Unrealized gains and losses that result from changes in foreign currency exchange rates have been included in the unrealized gains and losses on foreign currency translations. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date on investment securities transactions, foreign currency transactions and the difference between the amounts of interest and dividends recorded on the books of each Portfolio and the amount actually received. The portion of foreign currency gains and losses related to fluctuation in exchange rates between the purchase settlement date and subsequent sale trade date is included in realized gains and losses on investment transactions. The Portfolios do not isolate that portion of the results of operations resulting from changes in the foreign exchange rates on investments from the fluctuations in the market prices of securities held at the end of the period. Similarly, the Portfolios do not isolate the effect of changes in foreign exchange rates from the fluctuations in the market prices of portfolio securities sold during the period.

Foreign Securities: The Strategic Equity Portfolio, Small Cap Equity Portfolio, Equity Income Portfolio, Secured Options Portfolio, Global Secured Options Portfolio and Quantitative International Equity Portfolio may invest in foreign securities. Investing in securities of foreign companies and foreign governments involves special risks and considerations not typically associated with investing in securities of U.S. companies and the U.S. government. These risks include valuation of currencies and future adverse political and economic developments. Moreover, securities of some foreign companies and foreign governments and their markets may be less liquid and their prices more volatile than those of securities of comparable U.S. companies and the U.S. government. This is particularly true with respect to emerging markets in developing countries.

Options Transactions: The Strategic Equity Portfolio, Quantitative U.S. Long/Short Equity Portfolio, Secured Options Portfolio and Global Secured Options Portfolio are subject to equity price risk and may purchase or write covered call options or secured put options to hedge against changes in the value of securities each Portfolio owns or expects to own. The Secured Options Portfolio and Global Secured Options Portfolio use option strategies also in an effort to earn options premiums and to provide more stable returns. These options may relate to particular securities or securities indices and may or may not be listed on a domestic securities exchange or issued by the Options Clearing Corporation. A call option gives the option holder the right to purchase the underlying security at a specified price until a specified date. A put option gives the option holder the right to sell the underlying security at a specified price until a specified date. The risk in writing a call option is that the Portfolio may forgo the opportunity of profit if the market price of the underlying security increases and the option is exercised. The risk in writing a put option is that the Portfolio may incur a loss if the market price of the underlying security decreases and the option is exercised. In addition, there is a risk the Portfolio may not be able to enter into a closing transaction because of an illiquid secondary market or, for over-the-counter options, because of the counterparty's inability to perform. Portfolio assets covering written options cannot be sold while the option is outstanding, unless replaced by similar assets. A Portfolio also risks losing all or part of the cash paid for purchasing call and put options. The Portfolios may also write over-the-counter options where completing the obligation depends upon the credit standing of the other party. The Strategic Equity Portfolio and Quantitative U.S. Long/Short Equity Portfolio did not enter into any options transactions during the period ended July 31, 2021. During the period ended July 31, 2021, the Secured Options Portfolio and the Global Secured Options Portfolio wrote put and call options and purchased put and call options in an attempt to achieve their respective investment objective and strategies. As of July 31, 2021, the Secured Options Portfolio and Global Secured Options Portfolio pledged cash in the amount of \$17,500,246 and \$478,332 respectively, to brokers, as collateral for written options. In addition, security collateral (U.S. Treasury Bills and exchange-traded funds) valued at \$131,766,596 and \$3,499,383 was pledged as collateral by Secured Options Portfolio and Global Secured Options Portfolio, respectively.

Lending of Portfolio Securities: Each Portfolio, using State Street Bank and Trust Company ("State Street") as its lending agent, may loan securities to qualified brokers and dealers in exchange for negotiated lenders' fees. Each applicable Portfolio receives cash collateral (which may be invested by the lending agent in short-term instruments) and/or non-cash collateral (which may include U.S. Treasuries and/or U.S. Government Agency securities), in an amount at least equal to 102% (for loans of U.S. securities) or 105% (for loans of non-U.S. securities) of the market value of the loaned securities at the inception of each loan. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the applicable Portfolio on the next business day. On behalf of the Quantitative U.S. Long/Short Equity Portfolio and the Quantitative U.S. Total Market Equity Portfolio, some or all of the cash collateral may be used to finance short sales. The cash collateral received for the Quantitative U.S. Long/Short Equity Portfolio was not used to finance short sales during the period ended July 31, 2021. During the period ended July 31, 2021, the cash collateral received by the Quantitative U.S. Small Cap Equity Portfolio, Quantitative International Equity Portfolio, Quantitative U.S. Long/Short Equity Portfolio, Small Cap Equity Portfolio, Core Fixed Income Portfolio and Short Term Tax Aware Fixed Income Portfolio was invested in the State Street Navigator Securities Lending Government Money Market Portfolio, which is a 1940 Act money market fund. To the extent that advisory or other fees paid by the State Street Navigator Securities Lending Government Money Market Portfolio are for the same or similar services as fees paid by the applicable Portfolio, there will be a layering of fees, which would increase expenses and decrease returns. Information regarding the value of the securities loaned and the value of the cash collateral at period end is included at the end of each applicable Schedule of Portfolio Investments. Non-cash collateral detail is not disclosed in the Schedules of Portfolio Investments as it is held by the lending agent on behalf of the Portfolio, and the Portfolio does not have the ability to re-hypothecate those securities. A Portfolio could experience a delay in recovering its securities and a possible loss of income or value if the borrower fails to return the securities when due. A Portfolio may also record realized gain or loss on securities deemed sold due to a borrower's inability

Notes to Schedules of Portfolio Investments (Unaudited) — (Continued)

to return securities on loan. Such loans would involve risks of delay in receiving additional collateral in the event that the collateral decreased below the value of the securities loaned or risks of the loss of rights in the collateral should the borrower of the securities fail financially.

As of July 31, 2021, the following Portfolios had outstanding loans of securities to certain approved brokers for which such Portfolios received collateral:

Portfolio	Market Value of Loaned Securities	Market Value of Cash Collateral	Market Value of Non-Cash Collateral	% of Total Assets on Loan
Quantitative U.S. Large Cap Value Equity Portfolio	\$ 12,320	\$ —	12,486	0.50
Quantitative U.S. Small Cap Equity Portfolio	18,826	21,789	—	1.22
Quantitative International Equity Portfolio	9,286,831	5,787,490	4,308,844	18.63
Women in Leadership U.S. Equity Portfolio	623,644	—	632,730	2.28
Quantitative U.S. Long/Short Equity Portfolio	1,369,282	—	1,433,093	1.22
Quantitative U.S. Total Market Equity Portfolio	592,181	—	626,701	1.35
Small Cap Equity Portfolio	81,176,105	52,633,899	30,908,066	5.52
Core Fixed Income Portfolio	20,530,513	20,908,195	—	4.55
Short Term Tax Aware Fixed Income Portfolio	493,280	503,360	—	0.89

Real Estate Investment Trusts: The Portfolios may invest in real estate investment trusts (“REITs”), which pool investors’ funds for investment, primarily in income producing real estate or real estate-related loans or interests. A REIT is not taxed on income distributed to its shareholders or unitholders if it complies with regulatory requirements relating to its organization, ownership, assets and income, and with a regulatory requirement to distribute to its shareholders or unitholders at least 90% of its taxable income for each taxable year.

A shareholder in a Portfolio, by investing in REITs through the Portfolio, will bear not only the shareholder’s proportionate share of the expenses of the Portfolio, but also, indirectly, the management expenses of the underlying REITs. REITs depend generally on their ability to generate cash flow to make distributions to shareholders or unitholders, and may be subject to defaults by borrowers and to self-liquidations. In addition, the performance of a REIT may be affected by its failure to qualify for tax-free pass-through of income, or the REIT’s failure to maintain exemption from registration under the 1940 Act. Dividends representing a return of capital are reflected as a reduction of cost and/or as a realized gain when the amount of the return of capital is conclusively determined. See each Portfolio’s Schedule of Portfolio Investments for REIT securities held as of July 31, 2021.

Securities Sold Short: The Quantitative U.S. Long/Short Equity Portfolio and Quantitative U.S. Total Market Equity Portfolio may engage in short sales, which are sales by the applicable Portfolio of securities which have been borrowed from a third party on the expectation that the market price will decline. If the price of the securities declines, the Portfolio will make a profit by purchasing the securities in the open market at a lower price than the one at which it sold the securities. If the price of the securities increases, the Portfolio may have to cover its short positions at a higher price than the short sale price, resulting in a loss. Gains are limited to the price at which the Portfolios sold the security short, while losses are potentially unlimited in size. Each Portfolio pledges securities and/or other assets, which may include cash collateral from securities lending activities, to the lender as collateral. Proceeds received from short sales may be maintained by the lender as collateral or may be released to the Portfolio and used to purchase additional securities or for any other purpose. Each Portfolio is required to segregate an amount of cash, cash equivalents or other appropriate liquid marketable securities with the custodian in an amount at least equal to the current market value of the securities sold short (less any additional collateral held by the lender) and the amount of any securities lending cash collateral used to finance short sales until the Portfolio replaces a borrowed security. Depending on arrangements made with the lender or custodian, the Portfolio may not receive any payments (including interest) on the deposits made with the lender or custodian. The Portfolio is liable to the buyer for any dividends payable on securities while those securities are in a short position. These dividends are recorded as an expense of the Portfolio. As of July 31, 2021, the Quantitative U.S. Long/Short Equity Portfolio pledged cash in the amount of \$46,491,916 to State Street, as collateral for short sales. The Quantitative U.S. Long/Short Equity Portfolio and Quantitative U.S. Total Market Equity Portfolio also pledged securities in the amount of \$10,333,114, and \$11,957,802, respectively, to State Street, as collateral for short sales. In addition, State Street has a perfected security interest in a portion of each such Portfolio’s assets.

Investment Company Securities and Exchange-Traded Funds: Subject to applicable regulatory requirements, each Portfolio may invest in shares of other registered investment companies, including ETFs. Currently, pursuant to orders issued by the SEC to certain ETFs and procedures approved by the Board, each Portfolio may seek to invest in certain ETFs beyond the statutory limitations, provided the Portfolio complies with certain conditions of the SEC orders and any applicable investment limitations. Some ETFs seek to track the performance of a particular market index. These indices include both broad-market indices and more narrowly-based indices, including those relating to particular sectors, markets, regions, or industries. However, some ETFs have an actively managed investment objective. ETF shares and closed-end fund shares are traded like traditional equity securities on a national securities exchange or NASDAQ.

Fixed Income and Municipal Securities: The Core Fixed Income Portfolio, High Yield Municipal Portfolio and Short Term Tax Aware Fixed Income Portfolio invest in fixed income securities. The value of fixed income securities tends to fluctuate with changes in interest rates. Generally, their value will decrease when interest rates rise and increase when

Notes to Schedules of Portfolio Investments (Unaudited) — (Concluded)

interest rates fall. Fixed income securities are also subject to the risk that an issuer will be unable to make principal and interest payments when due which could adversely impact a Portfolio's return and NAV. Changes in the credit rating of a debt security held by a Portfolio could have a similar effect. Fixed income securities with longer maturities are more susceptible to interest rate fluctuations than those with shorter maturities. Although governmental financial regulators, including the Federal Reserve, have taken steps to maintain historically low interest rates; the Federal Reserve could raise interest rates at any time.

The High Yield Municipal Portfolio invests primarily in municipal securities and during the period, the Short Term Tax Aware Fixed Income Portfolio invested primarily in short term municipal securities. The value of, payment of interest on, repayment of principal for, and the ability to sell a municipal security may be affected by constitutional amendments, legislation, executive orders, administrative regulations, voter initiatives and the economics of the regions in which the issuers are located. A credit rating downgrade, bond default, or bankruptcy involving an issuer within a particular state or territory could affect the market values and marketability of some or all of the municipal obligations of that state or territory. In addition, since many municipal securities are issued to finance similar projects, especially those relating to education, health care, transportation and utilities, conditions in those sectors can affect the overall municipal securities market and a Portfolio's investments in municipal securities. There is some risk that a portion or all of the interest received from certain tax-exempt municipal securities could become taxable as a result of determinations by the Internal Revenue Service.

Securities Transactions and Investment Income: Securities transactions are recorded as of the trade date. Realized gains and losses on investments sold are computed on the basis of identified cost. Dividend income and distributions to shareholders are recorded on the ex-dividend date. Dividend income for foreign securities is recorded on the ex-dividend date except that certain dividends from foreign securities are recorded "net of withholding tax" as soon thereafter as a Portfolio is informed of the ex-dividend date. Interest income is recorded on the accrual basis and includes, when appropriate, amortization of premiums and accretion of discounts using the effective interest method.

Securities purchased or sold on a when-issued or delayed-delivery basis may be settled after a period longer than the regular settlement time of trade date plus three business days. Interest income is accrued based on the terms of the security on settlement date. Each Portfolio segregates assets with a current value at least equal to the amount of its when-issued purchase commitments. When-issued purchase commitments involve a risk of loss if the value of the security to be purchased declines prior to settlement date, or if the counterparty does not perform under the contract.

Other. In the normal course of business, the Fund enters into contracts that may include agreements to indemnify another party under given circumstances. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be, but have not yet been, made against the Fund. However, based on experience, the risk of material loss from such claims is considered to be remote.

2. Subsequent Events

Management has evaluated events or transactions subsequent to July 31, 2021 through the date the schedules of investments were filed with the Securities and Exchange Commission, and has determined that there were no material events that would require additional disclosure.

Notes to Schedule of Portfolio Investments (Unaudited)**1. Organization and Significant Accounting Policies**

The Glenmede Portfolios (the "Fund") is an investment company that was organized as a Massachusetts business trust on March 3, 1992, and is registered with the Securities and Exchange Commission under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company. As of July 31, 2021, the Fund offered shares of one sub-trust, the Muni Intermediate Portfolio (the "Portfolio"). The Portfolio is classified as diversified.

Valuation of Securities: Municipal obligations for which market quotations are readily available are valued at the most recent quoted bid price provided by investment dealers, provided that municipal obligations may be valued on the basis of prices provided by a pricing service when such prices are determined by the investment advisor to reflect the fair market value of such municipal obligations. These valuations are typically categorized as Level 2 in the fair value hierarchy described below. When market quotations are not readily available or events occur that make established valuation methods unreliable, municipal obligations are valued in a manner which is intended to reflect their fair value as determined in accordance with procedures approved by the Board of Trustees of the Fund (the "Board") and are typically categorized as Level 3 in the fair value hierarchy. The fair value of securities is generally determined as the amount that a Portfolio could reasonably expect to realize from an orderly disposition of such securities over a reasonable period of time. By its nature, a fair value price is a good faith estimate of the value of a security at a given point in time and does not reflect an actual market price, which may be different by a material amount. Debt obligations with maturities of 60 days or less at the time of purchase are valued on the basis of amortized cost and are typically categorized as Level 2 in the fair value hierarchy.

FASB ASC Topic 820, "Fair Value Measurements" defines fair value, establishes a three-level hierarchy for measuring fair value and expands disclosure about fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of the Portfolio's investments. Inputs refer broadly to the assumptions that market participants would use in pricing a security. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances. These inputs are summarized in the three levels listed below:

Level 1 — quoted prices in active markets for identical investments;

Level 2 — other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk and others) or valuations based on quoted prices in markets that are not active; and

Level 3 — significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities.

Changes in valuation techniques may result in changing an investment's assigned level within the hierarchy.

The Muni Intermediate Portfolio had all long-term investments, with corresponding states at Level 2 at July 31, 2021.

COVID-19: In early 2020, an outbreak of a novel strain of coronavirus ("COVID-19") emerged globally. This coronavirus has resulted in closing international borders, enhanced health screenings, healthcare service preparation and delivery, quarantines, cancellations, disruptions to supply chains and customer activity, as well as general public concern and uncertainty. The impact of this outbreak has negatively affected the worldwide economy, as well as the economies of individual countries, the financial health of individual companies and the market in general in significant and unforeseen ways. Although vaccines for COVID-19 are becoming more widely available, the future impact of COVID-19 is currently unknown, and the pace of recovery may vary from market to market, which may exacerbate other risks that apply to the Fund's Portfolio, including political, social and economic risks. Any such impact could adversely affect the Portfolio's performance, the performance of the securities in which the Portfolio invests and may lead to losses on your investment in the Fund's Portfolio. The ultimate impact of COVID-19 on the financial performance of the Portfolio's investments is not reasonably estimable at this time.

Municipal Securities: The value of, payment of interest on, repayment of principal for, and the ability to sell a municipal security may be affected by constitutional amendments, legislation, executive orders, administrative regulations, voter initiatives and the economics of the regions in which the issuers are located. A credit rating downgrade, bond default, or bankruptcy involving an issuer within a particular state or territory could affect the market values and marketability of some or all of the municipal obligations of that state or territory.

Since many municipal securities are issued to finance similar projects, especially those relating to education, health care, transportation and utilities, conditions in those sectors can affect the overall municipal securities market and the Portfolio's investments in municipal securities.

There is some risk that a portion or all of the interest received from certain tax-free municipal securities could become taxable as a result of determinations by the Internal Revenue Service.

Notes to Schedule of Portfolio Investments (Unaudited) — (Concluded)

Securities Transactions and Investment Income: Securities transactions are recorded as of the trade date. Realized gains and losses on investments sold are computed on the basis of identified cost. Interest income is recorded on the accrual basis and includes, when appropriate, amortization of premiums and accretion of discounts.

Securities purchased or sold on a when-issued or delayed-delivery basis may be settled after a period longer than the regular settlement time of trade date plus three business days. Interest income is accrued based on the terms of the security on settlement date. The Portfolio segregates assets with a current value at least equal to the amount of its when-issued purchase commitments. When-issued purchase commitments involve a risk of loss if the value of the security to be purchased declines prior to settlement date, or if the counterparty does not perform under the contract.

Other. In the normal course of business, the Portfolio enters into contracts that may include agreements to indemnify another party under given circumstances. The Portfolio's maximum exposure under these arrangements is unknown as this would involve future claims that may be, but have not yet been, made against the Portfolio. However, based on experience, the risk of material loss from such claims is considered to be remote.

2. Subsequent Events

Management has evaluated events or transactions subsequent to July 31, 2021 through the date the schedule of investments was filed with the Securities and Exchange Commission, and has determined that there were no material events that would require additional disclosure.
