- PSF — Permanent School Fund
- QSBLF — Michigan Qualified School Bond Loan Fund

Notes to Schedule of Portfolio Investments (Unaudited)**1. Organization and Significant Accounting Policies**

The Glenmede Portfolios (the "Fund") is an investment company that was organized as a Massachusetts business trust on March 3, 1992, and is registered with the Securities and Exchange Commission under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company. As of January 31, 2022, the Fund offered shares of one sub-trust, the Muni Intermediate Portfolio (the "Portfolio"). The Portfolio is classified as diversified.

Valuation of Securities: Municipal obligations for which market quotations are readily available are valued at the most recent quoted bid price provided by investment dealers, provided that municipal obligations may be valued on the basis of prices provided by a pricing service when such prices are determined by the investment advisor to reflect the fair market value of such municipal obligations. These valuations are typically categorized as Level 2 in the fair value hierarchy described below. When market quotations are not readily available or events occur that make established valuation methods unreliable, municipal obligations are valued in a manner which is intended to reflect their fair value as determined in accordance with procedures approved by the Board of Trustees of the Fund (the "Board") and are typically categorized as Level 3 in the fair value hierarchy. The fair value of securities is generally determined as the amount that a Portfolio could reasonably expect to realize from an orderly disposition of such securities over a reasonable period of time. By its nature, a fair value price is a good faith estimate of the value of a security at a given point in time and does not reflect an actual market price, which may be different by a material amount. Debt obligations with maturities of 60 days or less at the time of purchase are valued on the basis of amortized cost and are typically categorized as Level 2 in the fair value hierarchy.

FASB ASC Topic 820, "Fair Value Measurements" defines fair value, establishes a three-level hierarchy for measuring fair value and expands disclosure about fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of the Portfolio's investments. Inputs refer broadly to the assumptions that market participants would use in pricing a security. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances. These inputs are summarized in the three levels listed below:

Level 1 — quoted prices in active markets for identical investments;

Level 2 — other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk and others) or valuations based on quoted prices in markets that are not active; and

Level 3 — significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities.

Changes in valuation techniques may result in changing an investment's assigned level within the hierarchy.

The Muni Intermediate Portfolio had all long-term investments, with corresponding states at Level 2 at January 31, 2022.

COVID-19: In early 2020, an outbreak of a novel strain of coronavirus ("COVID-19") emerged globally. This coronavirus has resulted in closing international borders, enhanced health screenings, healthcare service preparation and delivery, quarantines, cancellations, disruptions to supply chains and customer activity, as well as general public concern and uncertainty. The impact of this outbreak has negatively affected the worldwide economy, as well as the economies of individual countries, the financial health of individual companies and the market in general in significant and unforeseen ways. Although vaccines for COVID-19 have become more widely available, the future impact of COVID-19 is currently unknown, and the pace of recovery may vary from market to market, which may exacerbate other risks that apply to the Fund's Portfolio, including political, social and economic risks. Any such impact could adversely affect the Portfolio's performance, the performance of the securities in which the Portfolio invests and may lead to losses on your investment in the Fund's Portfolio. The ultimate impact of COVID-19 on the financial performance of the Portfolio's investments is not reasonably estimable at this time.

Municipal Securities: The value of, payment of interest on, repayment of principal for, and the ability to sell a municipal security may be affected by constitutional amendments, legislation, executive orders, administrative regulations, voter initiatives and the economics of the regions in which the issuers are located. A credit rating downgrade, bond default, or bankruptcy involving an issuer within a particular state or territory could affect the market values and marketability of some or all of the municipal obligations of that state or territory.

Since many municipal securities are issued to finance similar projects, especially those relating to education, health care, transportation and utilities, conditions in those sectors can affect the overall municipal securities market and the Portfolio's investments in municipal securities.

There is some risk that a portion or all of the interest received from certain tax-free municipal securities could become taxable as a result of determinations by the Internal Revenue Service.

Notes to Schedule of Portfolio Investments (Unaudited) — (Concluded)

Shareholders should consult the Portfolio's prospectus for a complete listing of risks associated with the Portfolio.

Securities Transactions and Investment Income: Securities transactions are recorded as of the trade date. Realized gains and losses on investments sold are computed on the basis of identified cost. Interest income is recorded on the accrual basis and includes, when appropriate, amortization of premiums and accretion of discounts.

Securities purchased or sold on a when-issued or delayed-delivery basis may be settled after a period longer than the regular settlement time of trade date plus three business days. Interest income is accrued based on the terms of the security on settlement date. The Portfolio segregates assets with a current value at least equal to the amount of its when-issued purchase commitments. When-issued purchase commitments involve a risk of loss if the value of the security to be purchased declines prior to settlement date, or if the counterparty does not perform under the contract.

Other. In the normal course of business, the Portfolio enters into contracts that may include agreements to indemnify another party under given circumstances. The Portfolio's maximum exposure under these arrangements is unknown as this would involve future claims that may be, but have not yet been, made against the Portfolio. However, based on experience, the risk of material loss from such claims is considered to be remote.

2. Subsequent Events

Management has evaluated events or transactions subsequent to January 31, 2022 through the date the schedule of investments was filed with the Securities and Exchange Commission, and has determined that there were no material events that would require additional disclosure.
