

Investment Philosophy

We believe a diversified portfolio of international stocks may achieve long-term returns through capital appreciation, dividend income, and management of downside risk.

Investment Strategy

- Invests in undervalued international large cap companies we believe have attractive valuation, fundamentals, earnings trends and technical characteristics.
- Uses proprietary, multi-factor, sector- and country-specific models to rank stocks within each sector and region.
- Initial equal weight positions.
- Applies stringent risk screens and controls.
- Seeks broad diversification across countries, sectors, industries and companies.

Product Highlights

- Offers exposure to international equities through a quantitatively-based investment process with stringent risk controls.
- Integrates fundamental factors into proprietary quantitative models.
- Focuses on underperformance risk as much as outperformance opportunity.
