

**Investment Philosophy**

We believe that investor biases often lead to disconnects between a company's intrinsic value and its current price.

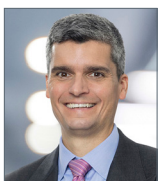

**Investment Objective**

Create an actively managed portfolio invested in undervalued, higher-quality stocks, with company specific catalysts seeking to outperform the benchmark over a full market cycle.

**Key tenets of our approach**

- We believe active management can add value within inefficient asset classes
- We believe positive earnings is an important measure of corporate quality
- A non-benchmark centric approach results in high active share
- Independent fundamental research leverages multi-factor quantitative screens
- Long term investment horizon supported by a consistent, repeatable process
