

Investment Overview

Disciplined investment process that seeks to invest in US large cap growth companies that have an attractive combination of valuation, fundamental, earnings and market technical characteristics.

Investment Philosophy

We abide by a disciplined approach anchored in comprehensive assessments of valuation, fundamental, and market technical factors.

We believe these characteristics can support above market returns over time. In our view, these “ideal” stock characteristics should be intuitive considerations for all investors.

Focusing on these attributes, rather than chasing short term price movements in the stock market, our process strives to produce differentiated sources of return over the long term.
