**Notes to Schedule of Portfolio Investments (Unaudited)****1. Organization and Significant Accounting Policies**

The Glenmede Portfolios (the "Fund") is an investment company that was organized as a Massachusetts business trust on March 3, 1992, and is registered with the Securities and Exchange Commission under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company. As of January 31, 2024, the Fund offered shares of one sub-trust, the Muni Intermediate Portfolio (the "Portfolio"). The Portfolio is classified as diversified.

**Valuation of Securities:** Municipal obligations for which market quotations are readily available are valued at the most recent quoted bid price provided by investment dealers, provided that municipal obligations may be valued on the basis of prices provided by a pricing service when such prices are determined by the investment advisor to reflect the fair market value of such municipal obligations. These valuations are typically categorized as Level 2 in the fair value hierarchy described below. When market quotations are deemed not readily available, unreliable or not indicative of fair value, municipal obligations are valued in a manner which is intended to reflect their fair value as determined in accordance with procedures approved by the Board of Trustees of the Fund (the "Board") and are typically categorized as Level 3 in the fair value hierarchy. The fair value of securities is generally determined as the amount that the Portfolio could reasonably expect to realize from an orderly disposition of such securities over a reasonable period of time. By its nature, a fair value price is a good faith estimate of the value of a security at a given point in time and does not reflect an actual market price, which may be different by a material amount. Debt obligations with maturities of 60 days or less at the time of purchase are valued on the basis of amortized cost and are typically categorized as Level 2 in the fair value hierarchy.

With respect to the Portfolio's investments that do not have readily available market quotations, the Board has designated the Portfolio's investment advisor as its valuation designee to perform fair valuations pursuant to Rule 2a-5 under the 1940 Act (in such capacity, the "Valuation Designee"). If market prices are not readily available or are deemed unreliable, the Valuation Designee will use the fair value of the security or other instrument as determined in good faith under policies and procedures established by and under the supervision of the Board ("Valuation Procedures"). Market prices are considered not readily available where there is an absence of current or reliable market-based data (e.g., trade information or broker quotes), including where events occur after the close of the relevant market, but prior to the NASDAQ Close, that materially affect the values of a Portfolio's holdings or assets. In addition, market prices are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which the securities or other instruments trade do not open for trading for the entire day and no other market prices are available. Investments valued using significant unobservable inputs are generally categorized as Level 3 in the fair value hierarchy. Fair value pricing is subjective in nature and the use of fair value pricing by the Valuation Designee may cause the NAV of the Portfolio's shares to differ significantly from the NAV that would have been calculated using market prices at the close of the exchange on which a portfolio holding is primarily traded. There can be no assurance that a Portfolio could obtain the fair value assigned to an investment if the Portfolio were to sell the investment at approximately the time at which the Portfolio determines its NAV.

FASB ASC Topic 820, "Fair Value Measurements" defines fair value, establishes a three-level hierarchy for measuring fair value and expands disclosure about fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of the Portfolio's investments. Inputs refer broadly to the assumptions that market participants would use in pricing a security. In some instances, the inputs used to measure fair value might fall in different levels of the fair value hierarchy. The level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest input level that is significant to the fair value measurement in its entirety. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances. These inputs are summarized in the three levels listed below:

Level 1 — quoted prices in active markets for identical investments;

Level 2 — other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk and others) or valuations based on quoted prices in markets that are not active; and

Level 3 — significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities.

Changes in valuation techniques may result in changing an investment's assigned level within the hierarchy.

The Muni Intermediate Portfolio had all long-term investments, that were placed at Level 2 of the valuation hierarchy at January 31, 2024.

**Municipal Securities:** The value of, payment of interest on, repayment of principal for, and the ability to sell a municipal security may be affected by constitutional amendments, legislation, executive orders, administrative regulations, voter initiatives and the economics of the regions in which the issuers are located. A credit rating downgrade,

**Notes to Schedule of Portfolio Investments (Unaudited) — (Concluded)**

bond default, or bankruptcy involving an issuer within a particular state or territory could affect the market values and marketability of some or all of the municipal obligations of that state or territory.

Since many municipal securities are issued to finance similar projects, especially those relating to education, health care, transportation and utilities, conditions in those sectors can affect the overall municipal securities market and the Portfolio's investments in municipal securities.

There is some risk that a portion or all of the interest received from certain tax-free municipal securities could become taxable as a result of determinations by the Internal Revenue Service.

Shareholders should consult the Portfolio's prospectus for a complete listing of risks associated with the Portfolio.

**Securities Transactions and Investment Income:** Securities transactions are recorded as of the trade date. Realized gains and losses on investments sold are computed on the basis of identified cost. Interest income is recorded on the accrual basis and includes, when appropriate, amortization of premiums and accretion of discounts.

Securities purchased or sold on a when-issued or delayed-delivery basis may be settled after a period longer than the regular settlement time of trade date plus three business days. Interest income is accrued based on the terms of the security on settlement date. The Portfolio segregates assets with a current value at least equal to the amount of its when-issued purchase commitments. When-issued purchase commitments involve a risk of loss if the value of the security to be purchased declines prior to settlement date, or if the counterparty does not perform under the contract.

**Other.** In the normal course of business, the Portfolio enters into contracts that may include agreements to indemnify another party under given circumstances. The Portfolio's maximum exposure under these arrangements is unknown as this would involve future claims that may be, but have not yet been, made against the Portfolio. However, based on experience, the risk of material loss from such claims is considered to be remote.

## **2. Subsequent Events**

Management has evaluated events and transactions subsequent to January 31, 2024 through the date the schedule of investments was filed with the Securities and Exchange Commission, and has determined that there were no material events that would require additional disclosure.
