

Investment Philosophy

We believe a portfolio of select large cap stocks may achieve above-benchmark long-term performance through capital appreciation, and by seeking to limit downside risk.

Investment Strategy

- Invests in large cap companies we believe are more favorable on faith-based issues.
- Uses proprietary, multi-factor, sector-specific models to rank stocks in each sector.
- Stock specific weight limits.
- Optimizes the portfolio to provide broad diversification across sectors, industries and individual companies, while controlling turnover.
- Uses proprietary risk screens seeking to eliminate stocks we believe are likely to underperform.

Product Highlights

- Quantitatively-based investment process with stringent risk controls.
- Integrates fundamental factors into proprietary quantitative models.
- Focuses on underperformance risk as much as outperformance opportunity.

The Quantitative U.S. Large Cap Faith-Based Equity Composite objective is to provide maximum long-term return with reasonable risk to principle, by investing in domestic stocks of the Russell 1000 and Standard & Poor's 500 universes and in large cap ADRs, excluding those companies and sectors requested by certain religiously-motivated values investors; including, in particular, entities informed by the principles of Christian Science and Roman Catholicism. Prior to 08/30/2022, this composite was known as the Quantitative U.S. Large Cap Socially Responsible Composite.

The Russell 1000 Index is an unmanaged, market value weighted index, which measures performance of the largest 1,000 companies in the market. One cannot invest directly in an index.
