

Formerly Responsible ESG U.S. Equity Portfolio

## Investment Philosophy

GIM believes that underlying stock characteristics are determining factors that drive above market performance over time. In our view, these “ideal stock characteristics” should be intuitive considerations for all investors.

## Investment Strategy

- Invests in large cap companies we believe have favorable environmental characteristics
- Emphasizes environmental accountability and high quality disclosure
- Tilts towards companies exhibiting improving environmental characteristics and lower emissions
- Seeks to promote industry best practices for climate change through environmentally-aligned proxy voting and shareholder resolutions

## Product Highlights

- Quantitatively-based investment process with stringent risk controls.
- Integrates fundamental factors into proprietary quantitative models.
- Focuses on underperformance risk as much as outperformance opportunity.
- May well be suited for investors interested in a data-driven approach to investing in companies with strong and improving environmental commitments.

Holdings and sector allocations are subject to change and are not recommendations to buy or sell any security. All figures based on monthly data as of 3/31/2025, unless otherwise noted.

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the Environmental Accountability Portfolio please visit [www.glenmedeim.com/funds/](http://www.glenmedeim.com/funds/) OR please call 1.800.442.8299. Read the prospectus or summary prospectus carefully before investing.

**Mutual fund investing involves risks; principal loss is possible. The Fund may invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. The Fund may invest in IPOs and the market value of IPO shares could fluctuate considerably due to factors such as the absence of a prior public market, unseasoned trading, the small number of shares available for trading, and limited information about the issuer. Diversification does not assure a profit or protect against loss in a declining market.** All returns are calculated in U.S. dollars.

**Environmental:** The application of minimum environmental performance standards will affect the Portfolio's exposure to certain issuers, industries, sectors, regions and countries and may impact the relative performance of the Portfolio – positively or negatively – depending on whether such investments are in or out of favor.

**Beta:** systematic risk of a portfolio; represents sensitivity to the benchmark. **Excess Return:** amount that returns exceed relative benchmark return.

**Information Ratio:** ratio of expected return to risk, as measured by standard deviation. **Sharpe Ratio:** sharpe ratio is a simple measurement of the risk-adjusted performance. **Price to Book (P/B):** ratio of stock price to per share shareholders' equity. **Price to Earnings (P/E):** ratio of stock price to earnings.

**Batting Average:** batting average is calculated by dividing the number of quarters in which the manager beats or matches the Index by the total number of quarters in the period of question and multiplying that factor by 100. **Return on Equity (ROE):** net income divided by equity. **Standard Deviation:** measures dispersion of a set of data from its mean. **5-Year EPS Growth:** annualized historical earnings per share growth over the last 5 years. EPS Growth is not a forecast of the fund's future performance. **Tracking Error:** measures the active risk of the portfolio and the annualized standard deviation of the excess returns between the portfolio and its benchmark. **Weighted Average Market Cap:** total value of all outstanding shares weighted to reflect the portfolio's positions. The Russell 1000 Index is an unmanaged, market-capitalization-weighted total return index comprised of the largest 1,000 companies in the Russell 3000 Index. This unmanaged index is a total return index with dividends reinvested. The S&P 500 Index is a broad based unmanaged index of 500 stocks, which is widely recognized as representative of the equity market in general. **One cannot invest directly in an index.** Total returns comprise price appreciation/depreciation and income as a percentage of the original investment. MSCI ESG RATINGS is designed to identify ESG risks or opportunities that may not be captured through conventional analyses. With robust research, ratings and analysis of corporate management of environmental, social and governance factors, MSCI ESG Ratings provides institutional investors with a more comprehensive ESG integration solution. **The Fund is distributed by Quasar Distributors, LLC.**
