Excess Return	-1.60	-5.01	-8.19	0.71	5.08	n/a	1.52

¹Annualized returns. Performance Inception Date: 11/13/2017; Institutional Shares Inception Date: 5/5/2025. ²The Institutional Shares commenced operation on May 5, 2025; therefore, performance listed for the Institutional Shares prior to the inception date (11/13/17 through 5/5/25) is based on the average total return for the Advisor Shares. Performance listed for the period of 5/5/2025 through 9/30/2025 is the average annual total return for the Institutional Shares

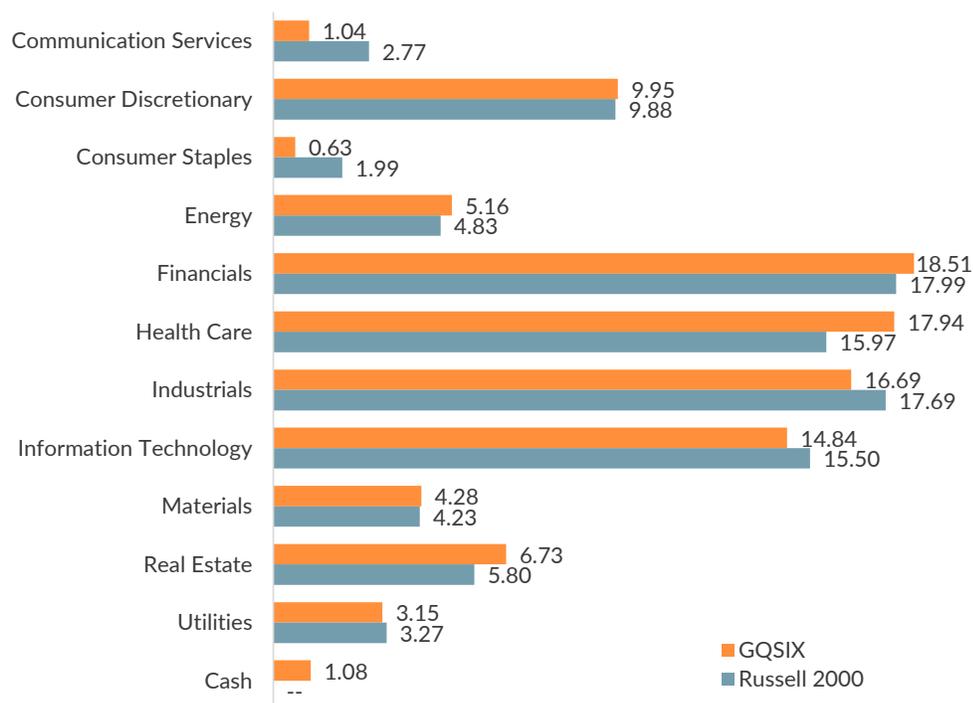

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will change so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 1.800.442.8299. Performance would have been lower without expense limitations in effect.

All figures based on monthly data as of 9/30/2025, unless otherwise noted. All returns are calculated in U.S. dollars.

Total returns comprise price appreciation/depreciation and income as a percentage of the original investment.

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the Disciplined U.S. Small Cap Equity Portfolio please visit www.glenmedeim.com/funds/ OR please call 1.800.442.8299. Read the prospectus or summary prospectus carefully before investing.

Mutual fund investing involves risks; principal loss is possible. The Portfolio is subject to the risk that the stocks of smaller and newer issuers can be more volatile and more speculative than the stocks of larger issuers. Smaller companies tend to have limited resources, product lines and market share. Diversification does not assure a profit or protect against loss in a declining market.

Excess Return: amount that returns exceed relative benchmark return. **Weighted Average Market Cap:** total value of all outstanding shares weighted to reflect the portfolio's positions. **Price to Earnings (P/E):** ratio of stock price to earnings. **Price to Book (P/B):** ratio of stock price to per share shareholders' equity. **Return on Equity (ROE):** net income divided by equity. **5-Year EPS Growth:** annualized historical earnings per share growth over the last 5 years. EPS Growth is not a forecast of the fund's future performance. **Active Share:** measures the percentage of stock holdings in a manager's portfolio that differs from the benchmark index. **Sharpe Ratio:** sharpe ratio is a simple measurement of the risk-adjusted performance. **Tracking Error:** measures the active risk of the portfolio and the annualized standard deviation of the excess returns between the portfolio and its benchmark. **Standard Deviation:** measures dispersion of a set of data from its mean. **Beta:** systematic risk of a portfolio; represents sensitivity to the benchmark. The Russell 2000 Index is an unmanaged, market value weighted total return index which measures the performance of the 2,000 companies that are between the 1,000th and 3,000th largest in the market. **One cannot invest directly in an index.** The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history, without adjustment for sales loads. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. © 2025 Morningstar, Inc.
