³The Institutional Shares commenced operation on May 5, 2025; therefore, performance listed for the Institutional Shares prior to the inception date (11/17/88 through 5/5/25) is based on the average total return for the Advisor Shares. Performance listed for the period of 5/5/2025 through 12/31/2025 is the average annual total return for the Institutional Shares

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will change so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 1.800.442.8299. Performance would have been lower without expense limitations in effect.

Mutual fund investing involves risks; principal loss is possible. The risks associated with foreign investments are heightened when investing in emerging markets. The Fund invests in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. Diversification does not assure a profit or protect against loss in a declining market.

Excess Return: amount that returns exceed relative benchmark return. **Weighted Average Market Cap:** total value of all outstanding shares weighted to reflect the portfolio's positions. **Price to Earnings (P/E):** ratio of stock price to earnings. **Price to Book (P/B):** ratio of stock price to per share shareholders' equity. **Return on Equity (ROE):** net income divided by equity. **5-Year EPS Growth:** annualized historical earnings per share growth over the last 5 years. EPS Growth is not a forecast of the fund's future performance. **Active Share:** measures the percentage of stock holdings in a manager's portfolio that differs from the benchmark index. **Sharpe Ratio:** sharpe ratio is a simple measurement of the risk-adjusted performance. **Tracking Error:** measures the active risk of the portfolio and the annualized standard deviation of the excess returns between the portfolio and its benchmark. **Standard Deviation:** measures dispersion of a set of data from its mean. **Beta:** systematic risk of a portfolio; represents sensitivity to the benchmark. The MSCI World ex US Index is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the US. The MSCI World ex US Index consists of the following 22 developed market country indices: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the UK. **One cannot invest directly in an index.
