Please see the GIPS® presentation for further explanation.

The SMID Equity Composite objective is to provide maximum long-term total return consistent with reasonable risk to principal, by investing primarily in common stocks with market capitalization at the time of purchase less than the maximum capitalization permitted for a stock in the Russell 2500 Index.

The Russell 2500 is a market-cap-weighted Index that includes the smallest 2,500 companies covered in the broad-based Russell 3000 sphere of United States-based listed equities. All 2,500 of the companies included in the Index cover the small- and mid-cap market capitalizations. This unmanaged Index is a total return index with dividends reinvested. One cannot invest directly in an index.
